Clock Tower Stage and Information Booth

The Clock Tower is the focal point of the entire complex and includes an information booth, a small stage, a dressing room and a restroom.

Located behind the information booth, the Clock Tower Stage offers space with adequate power supply for any type of concert or special event. The covered stage is 42' wide and 27' deep. The semi-circular stage has built-in basic lighting, and a handicap accessible ramp that can be used to load equipment.

The Clock Tower Stage may be used in conjunction with any other building, if available, for concerts or other special events held on the grounds. We look forward to having your event here!
